### V. Information about MATE ID, Neptun code, password and webmail

At the Hungarian University of Agriculture and Life Sciences (henceforward MATE) the access to informatic systems happens with a unified user ID. It is called MATE ID, in case of students it is the same as Neptun ID initially.

The SZIU/Neptun ID and the joint webmail box is automatically generated by the activated student status. However, the mailbox is disabled, and can not be used until activation.

You may activate your MATE ID at the <https://joker.szie.hu> website, the initial password is Ne and your birth date in format of YYYYMMDD (ex.: Ne19960229) To activate your ID, you have to change your password.

The information about webmail is available here: <https://archive.uni-mate.hu/en/current-students/mate-authentication-wifi-e-learning-email>

With activation of your MATE ID, you activate your e-learning access as well.

Please, note that, when you activated your MATE ID at joker website, it is not influencing your password you had set in Neptun system. Therefore, you have got two entry with the same login name (neptun code) but maybe with different passwords.
